

A FUN New Book Series For Readers Young & Old About Growing Up “Weird” in The Great North & Deep South

This three-part book series takes the reader along a lighthearted real-life journey with a twelve-year-old girl, Wendy, as she struggles with pre-adolescent issues while her family makes a life-altering decision to move from Ontario, Canada to North Carolina in the United States.

The book series confronts and explores childhood and life issues such as:

- Bullying/teasing
- Moving to a new place and new school – facing changes
- Keeping true to your own values in the face of teasing
- Confusing hormonal feelings (very lightly confronted)
- Losing/leaving best friends
- Grieving loss of pets
- Making new friends

The **Wearing My Weird** book series confronts all these issues, yet lightens the load by adding humor. Humor is the spoonful of sugar that helps the medicine go down! When you're young, everything seems so very important – and humor certainly helps the problems shrink down to size in order to feel hopeful again. The book series exhibits how humor helps in family and friendship situations to get through the HARD and get to the HOPE.

Book One: **Wearing My Weird ~ in The Great White North**

Life is weird, eh? Yep, it sure is. Especially in Canada, where even the money is called “Loony.” Journey with me as I share my own personal story about what it's like growing up always feeling a little different. You can move from one country to another, but no matter how far you travel, you can never escape from the true YOU.

Hey, take it from me. I tried.

In these stories you'll meet real characters from my childhood who were also delightfully strange. That includes my little sister, Mom and Dad, a few quirky friends, my Nana and Soupy, and a big fat cat called Bingo.

Yes, life is weird. And there's one thing I learned growing up:

It just keeps getting weirder.

And I guess so do I.
